

One platform for wired and wireless openings.

Cube Access manages **Axis network door controllers** for wired openings and **Schlage ENGAGE wireless locksets** from a single system — one credential set, shared schedules and holidays, and a live event stream across every door. Access decisions are made **at the lock** for instant, offline-resilient operation.

HOW IT WORKS

1

Axis Controller

Drives wired openings (reader, REX, door position) and hosts the secure on-site bridge to the wireless gateway.

2

ENGAGE Gateway

The 410 IP gateway links Schlage wireless locksets over Bluetooth LE and relays credentials and audits.

3

Cube Access

Central management of users, credentials, schedules and holidays — with real-time events from every opening.

One controller, two jobs

Each **Axis network door controller** manages its own wired openings directly — readers, request-to-exit, and door-position sensors — making grant / deny decisions locally with full offline operation. The **same controller** also acts as the secure on-site **dispatcher** for the ENGAGE gateway: Cube Access reaches the gateway *through* the controller, which relays credentials, schedules, and audits to the wireless locksets over the local network. No separate server or appliance is required — the controller you already deploy for wired doors becomes the bridge to your wireless ones.

SUPPORTED HARDWARE & PART NUMBERS

CATEGORY	MODEL	DESCRIPTION	PART NO.
Access Controller	AXIS A16–A18	Network door controller for wired openings (fw 12+ / NBIX). Scales 1–8 doors (A1210/A1610/A1710/A1810) — complete or -B barebone.	A1210 02368-001 A1610-B 02654-001
			A1210-B 02369-001 A1710-B 03078-001
			A1610 02653-001 A1810-B 03079-001
Wireless Gateway	ENGAGE Gateway · GWE2	Ethernet / IP gateway bridging Bluetooth LE locksets to the network.	48459029
Wireless Lockset	Schlage NDE	Wireless cylindrical lock — interior and perimeter doors.	NDE / NDEB †
Wireless Lockset	Schlage LE	Wireless mortise lock — higher-security and higher-traffic openings.	LE / LEB †
Wireless Lockset	Schlage Control	Wireless deadbolt / interconnected lock — multifamily suites.	BE467 / FE410 †
Wireless Lockset	Schlage XE360	Wireless mortise, tubular & exit-trim for wide-stile / exit devices.	XE360 †

KEY CAPABILITIES

- **One credential, every door.** The same card works across wired and wireless openings.
- **Instant, local decisions.** Locks grant access on-board — no round-trip, works offline.
- **Over-the-network updates.** Gateway and lock firmware managed remotely.
- **Shared schedules & holidays.** Define once; apply to any opening type.
- **Real-time events & audit.** Access and door events stream to one live feed.
- **No new server on site.** The existing Axis controller hosts the bridge.
